

FIBERMAN MOVES FORWARD

Southwell's Fiberglass division has seen tremendous growth over 2009, and early 2010. The Strongwell brand of fiberglass has proven itself over and over to be the top quality FRP for industrial and heavy use.

FRP can be used in a surprisingly wide variety of applications where wood and metals are traditionally used. Its top benefits include: Corrosion Resistant; Low Conductivity - Thermally and Electrically; Non-Magnetic - Electromagnetic Transparency; Lightweight; High Strength; Dimensional Stability; and Low Maintenance.

FIBERMAN

SIRCO SAMPLER SPOTLIGHT

SIRCO is proud to announce a new sampler option, never seen before: 5/8" ID Discrete samplers.

SIRCO

Suck it up.

This means it is now possible to take samples with a larger intake tube, for tougher applications, into multiple bottles.

NEW!

BCWWA AND BEYOND

We will be at booth #1002 at the Whistler BCWWA Trade Show May 1-4. **Come by for a FREE GIFT!** The first fifty people to come by and give a correct answer to the trivia question on the right will receive a special free gift on us!

MAY 1-5, 2010

Trivia Question

If all the world's water were fit into a gallon jug (3.8L), the fresh water available for us to use would equal:

A: 1 cup (250ml) B: ½ cup (125ml) C: ¼ cup (63ml) D: 1 Tbsp (15ml)

ONTARIO OPERATIONS

The first quarter of 2010 has been very exciting and successful in Ontario. Half a dozen major installations of Strongwell's FRP line are now in process or completed in major facilities. Each of these projects have given Southwell Corp and the Strongwell FRP brand a good name. Strongwell's FRP is slated to be installed in another half dozen major facilities by the end of 2010.

The growth of the SIRCO Sampler line in Ontario has come about through renewed interest from the likes of Maple Leaf Foods and the Zielinski Group. The vacuum technology that powers the SIRCO Sampler gives it a distinctive edge over peristaltic samplers, and efforts to promote the line to major water quality organizations has been met with positive results.

FURTHERING FABRICATION

Early 2010 saw the completion of Southwell's largest fabrication contract. Our shop is currently available to do fabrication on anything from small jobs to large projects.

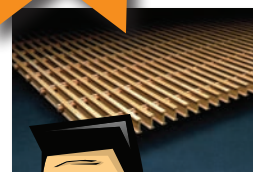

FIBERMAN

Featuring the Fiberglass products of:

- FRP Structures & Fabrications
- Duradek® / Duragrid® Pultruded FRP Grating
- Duragrate® FRP Molded Grating
- Extren® Pultruded FRP Structural Shapes:
- Safraill™ FRP Handrail & Ladders
- Safplate® FRP Pultruded Plate
- Safplank® & Safdeck® FRP Pultruded Panels
- Composolite® FRP Building Panel System
- Durashield® FRP Foam & Hollow Core Panel

Certified FRP Material on select products

SIRCO

Suck it up.

- Automatic Wastewater
Samplers, Vacuum Type
- Portable Samplers
 - Stationary Samplers

Manufactured in BC Since 1982.

BARBEN

Analyzer Technology, LLC

The 3rd generation sensor from the same mind that brought you the first two.

- pH, ORP & Conductivity
- Dissolved Oxygen & ISE Sensors
- Turbidity & Suspended Solids
- Transmitters, Analyzers & Accessories

Greyline

instruments inc.

- Ultrasonic Level
- Tank Farm Transmitters
- Transit Time Flow Meters
- Doppler Flow Monitors & Switches
- Open Channel Flow Monitors

- Pressure Switches
- Pressure Transmitters
- Temperature Switches
- Temperature Transmitters
- Level Switches
- Ultrasonic Level Transmitters
- Flow Switches

Kytola

INSTRUMENTS

- Flowmeters
- Seal Liquid Monitoring
- Constant Flow Regulators
- Oval Gear Flowmeters
- Oilan

AMETEK®

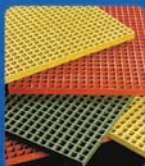

- Float Switches
- Magnetostrictive Continuous Level Indicators
- Ultrasonic Gap Switches
- Induction Type Level Control Relays
